Professional Summary ----------

- **Python Developer** with hands-on experience in **Python programming, data analysis, backend development, and automation systems**. Strong expertise in Python libraries including Pandas, NumPy, and OpenCV for data processing and analysis. Experienced in building Python-based applications, REST APIs, database-integrated systems, and data-driven dashboards. Solid foundation in Data Structures, SQL, and scalable backend logic. Focused on writing clean, efficient Python code and solving real-world business problems using data.

Tech Skills ----------

- **Programming -** Python (Advanced), SQL, C, JavaScript.
- **Python Libraries & Frameworks** – Pandas, NumPy, OpenCV, Jupyter Notebook.
- **Data Science & Analytics** – Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis.
- **Backend Development -** Python-based logic building, REST API Development, Authentication (JWT), Role-Based Access Control
- **Database -** MySQL, PostgreSQL, MongoDB.
- **Tools & Platforms -** Git, GitHub, Postman, VS Code, Power BI, Advanced Excel, Vercel, Railway.
- **Core Concepts -** Object-Oriented Programming (OOP), Data Structures & Algorithms, Time Complexity Optimization, MVC Architecture.

Professional Experience ----------

- **Faculty – Disha Institute** **Aug/2025 – Present**
  Working as a Faculty at Disha Institute since August 2025, delivering structured training in Python programming, Pandas, NumPy, SQL, and data analysis. Mentored 15+ students in real-world dataset handling, data cleaning, and EDA. Designed practical assignments and strengthened students' logical thinking, problem-solving ability, and database integration skills.
- **Vocational Training – NTPC Singrauli** **14th Aug – 13th Sept/2025**
  During vocational training at NTPC Singrauli, developed a Python-supported backend workflow system (NTPC Clipping Portal). Implemented structured SQL database operations and backend logic, designed secure authentication and file handling mechanisms, and automated internal document processing workflows to improve operational efficiency and streamline media management processes.

Projects ----------

- **Customer Behaviour Analysis | Python, Pandas, NumPy, MySQL, Power-BI**
  • Performed data cleaning and preprocessing using Python (Pandas, NumPy)
  • Executed SQL queries for structured data extraction
  • Conducted Exploratory Data Analysis (EDA) using Python
  • Built visual dashboards to identify trends and business insights
  • Generated data-driven recommendations based on analysis
- **Face Recognition Attendance System (Python + OpenCV)**
  • Built a Python-based real-time face recognition system
  • Integrated OpenCV for image processing and detection
  • Automated attendance logging using Python database integration
  • Reduced manual errors through AI-based automation
- **QR-Based Restaurant Ordering System | (Backend Logic)**
  Tech Stack - MongoDB, React.js, Node.js, Express.js, Typescript, Tailwind CSS
  • Designed backend logic and database schema
  • Implemented REST APIs and authentication flow
  • Managed structured data storage and retrieval
  • Ensured secure communication between frontend and backend

Achievements & Coding Profile ----------

- Solved 80+ Data Structures & Algorithms problems using Python
- Strong understanding of Python problem-solving and algorithm design
- Deployed multiple Python-based and full-stack projects

Education ----------

- **Master of Computer Application**
  Aug/2021 – Present
  IPS Academy, Indore (M.P.)
  (6.96 CGPA)

Certification ----------

Data Analysis - Disha institute.
Frontend Developer - Great Learning.
Vocational Training - NTPC Singrauli.
